The Air–Gapped Intelligence Stack

Hyperlink AI is a specialized on-prem AI infrastructure that powers a private intelligence stack and AI hub. Hyperlink AI enables your team to use generative AI on sensitive internal documents without the cloud, without external APIs, and without an internet connection.

The Brain — a locally hosted open-source AI model optimized for real workflows: drafting, summarization, structured reporting, and internal knowledge support.

The Vault — a private knowledge layer built from approved internal documents, enabling secure search and retrieval inside your own environment.

Use AI for internal roles and functions, boosting productivity — without cloud risk.

▶ **Zero Cloud Architecture** – runs fully local on your infrastructure.

▶ **Task-Specific Indexing** – configured for specific departmental workflows.

▶ **Dynamic Data Ingestion** — build a private knowledge base from approved internal documents.
